

Scientific Name: Red alder

Common name: *Alnus rubra*

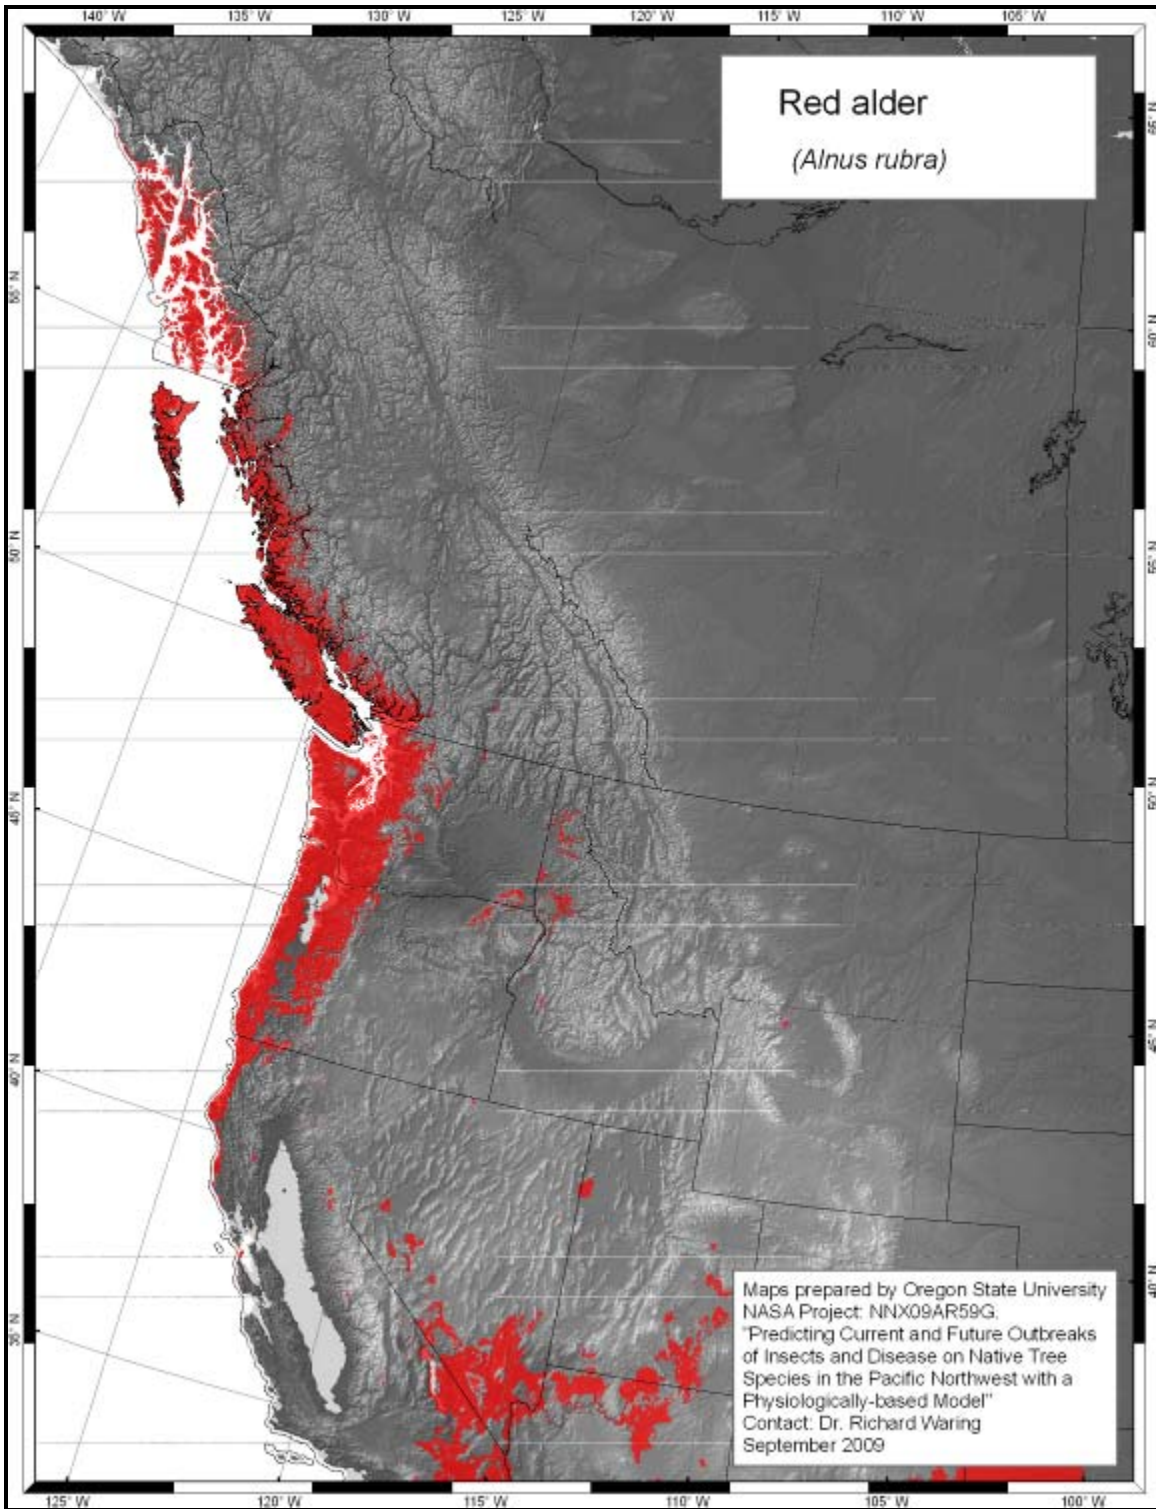

Decision tree for extrapolating most influential variables to tree species presence/absence

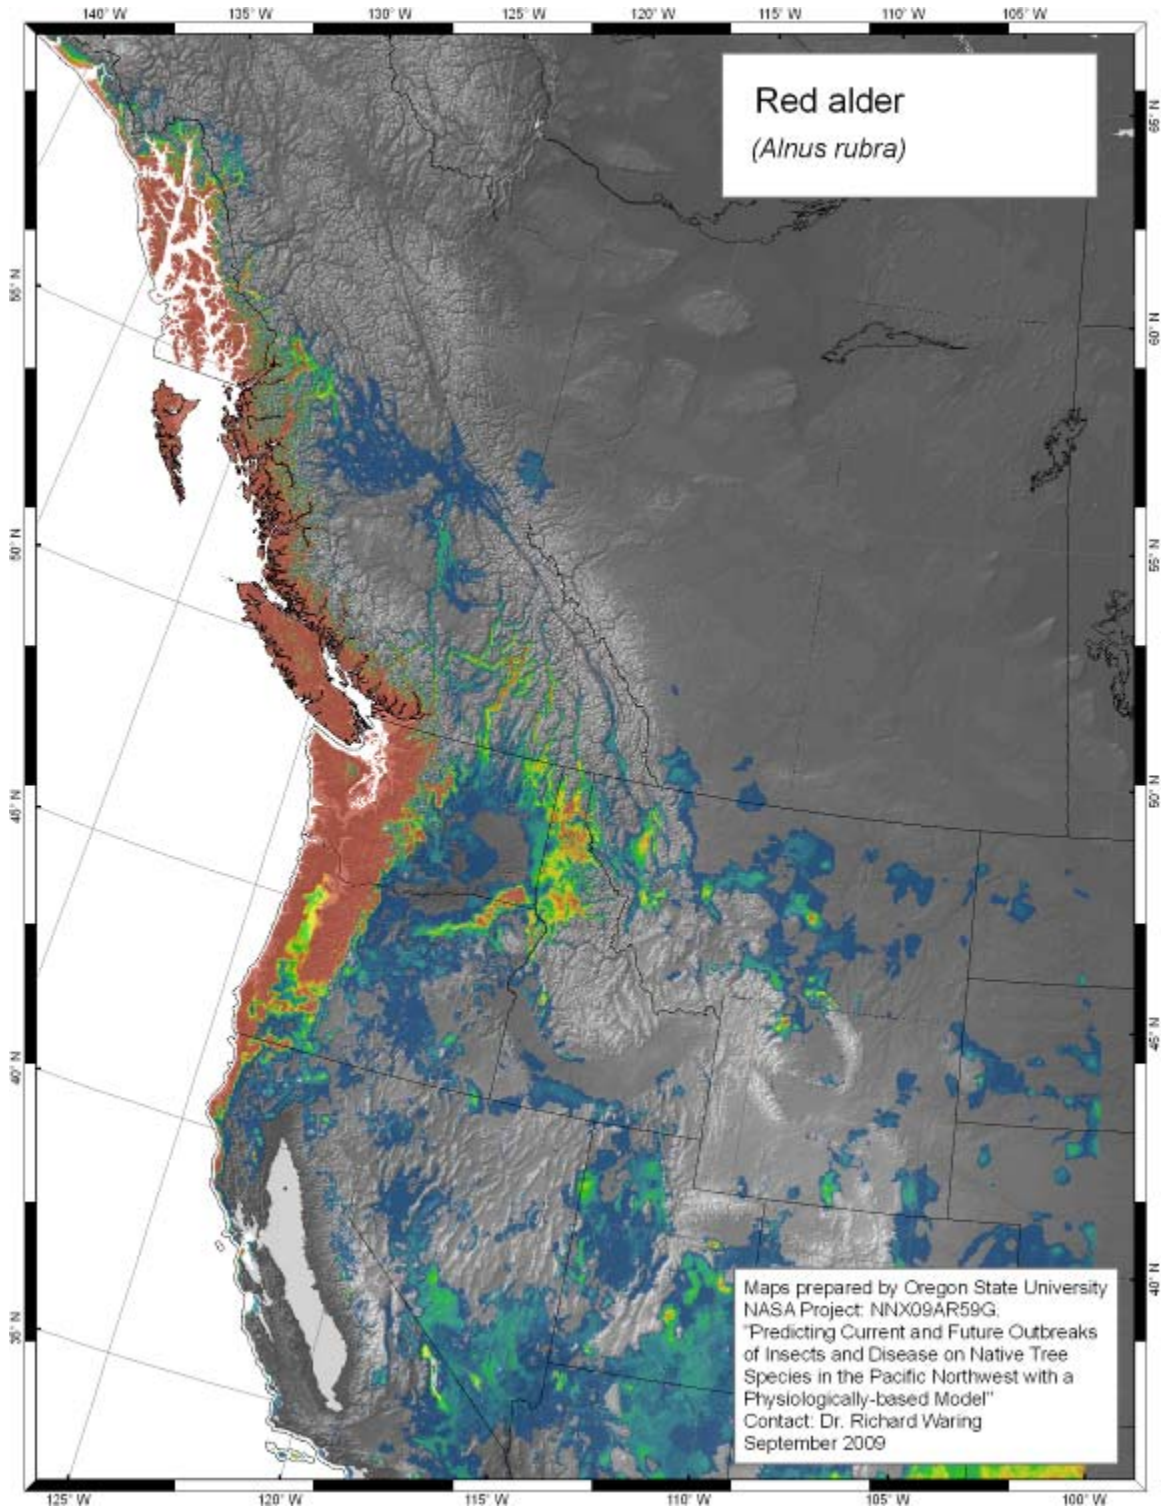

Red alder

Pie chart showing relative effects of most influential model variables for the species

Model predicted range of Red alder using long term climate data

Continuous model of predicted frequency of presence for a 50 year period

Modelled ranges for IPCC climate scenarios A2 and B1 for years 2020, 2050, and 2080
